

Our Service

- **Series and consignment stock**

We have several stocks available for you, so that your series products can be released within a short time to ensure your delivery on time.

Of course we are able to deliver your products to a consignment stock as well.

- **Assembly of magnet modules**

The assembly of modules with magnets is often manual labor and requires logistical and special effort. We will take over of your effort and deliver a customized assembly according to your specifications.

- **Glueing**

- Glueing of magnets and laminated cores
- Glueing of magnets and axles or rotors
- Glueing of magnets and stators, housings
- Glueing of magnets and linear rails

- **Testing of permanent magnet properties with MagCheck**

- Measurement of magnetic moment
- Measurement of magnetization angle error
- Determination of remanence
- Evaluation of parameters with protocol
- Automatic data save in files

- **Analysis of magnet field and magnetic materials with HAMOD**

- Measurement and analysis of magnet field distribution
- Measurement and analysis of magnet material failure
- Evaluation with protocol und magnet field pictures in high resolution

- **Analysis of materials, testing of cleanliness and corrosion resistance**

- Analysis of magnetic material component
- Analysis of magnet surface coating
- Technical cleanliness according to VDA 19 / ISO 16232
- Salt spray test according to DIN EN ISO 9227 NSS / AASS / CASS for corrosion resistance

- **Calibration of measurement device MagCheck**

Did you purchase MagCheck by us and you need a calibration of this device?

No Problem!

We calibrate your MagCheck with protocol quickly and easy for you.

And you have possibility to get a transport box from us for secure shipping.

- **Repair service**

Do you have defective magnets or magnet modules?

We will gladly check for you if a repair is economical and offer you a suitable repair offer.

Better magnets for a better world.
