

mPx Stereo™

Gain perspective of reality with mPx Stereo™

mPx Stereo™ adds depth to your visuals

MetaPeakx's stereoscopy software is a key technology that allows to operate in different environments with the sense of depth.

mPx Stereo accounts for the disposition of the human eyes, adding **depth** and **realism** to imagery. This allows you to accurately operate any machine in complex or challenging environments.

Mixing mPx Stereo with mPx 360 provides you with **high resolution 360°** stereoscopic stitching, transposing your reality into the virtual realm with the depth and detail you need.

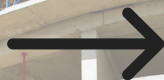

Where & How should you use mPx Stereo™ ?

Applications

- Remote operation
- High Resolution live broadcasting
- Low visibility vehicles
- 3D film producing

Industries

- Utilities
